Tablets / Box

# LACTO-VOX + zinc

## Capsule

Also synthesis and supplies Vitamin B Components within the gastrointestinal tract. This yeast is genetically resistant to antibacterial agents and can be taken in conjunction with antibiotics to prevent diarrhea.

### Supplement Facts

EACH FILM COATED TABLET CONTAINS	AMT. PER SERVING	%DV
Energy	25 kcal	**
Carbohydrates	7.09 g	**
Protein	0.011 g	**
Fat	0.09 g	**
Lactobacillus Acidophilus	2 billion	**
Bifodobacterium bifidum	1 billion	**
Lactobacillus Bulgaricus	1 billion	**
Saccharomyces Boulardii	1 billion	**
Fructo-Oligosaccharides	100 mg	**
Zinc	10 mg	**

### PHARMACOLOGICAL ACTION

Acute infectious diarrhea results from a disruption of the gastrointestinal ecosystem, thus favoring the colonization by enter pathogens and promoting their ability to upset the enter systemic water cycle. Thus, along with specific anti-diarrheal medication, there should also be active rehydration of the patient. LACTOVOX CAPSULES contains a living yeast, LACTOVOX CAPSULES, which is active in the gastrointestinal tract. This yeast has an antagonistic effect against the overgrowth of different enter pathogenic bacteria (Shigelladysenteriae, Salmonella typhi, Escherichia coli) and Candida albicans.

It also enhances non-specific immune defences in the case of

experimental bacteria (Staphylococcus aureus, Salmonella enteritidis) or fungal (Candida albicans) invasions. These actions re-establish the equilibrium of the gastrointestinal ecosystem and so reduced diarrhea.

### INDICATIONS

► Gastrointestinal disorders: Antibiotic associated diarrhoea, Irritable bowel syndrome, Inflammatory bowel disease, Restoring the balance of the intestinal Microbiota, Alleviation of lactose intolerance symptoms.

► Boosting the immune system

► To prevent certain cancers

► Bacterial vaginosis and candidiasis

► To reduce the risk of respiratory tract infections

► Atopic dermatitis

### DOSAGE

1 Capsule twice daily with or immediately after a main meal

### KNOWN SYMPTOMS OF OVERDOSAGE AND PARTICULARS OF TREATMENT

LACTOVOX CAPSULES is not absorbed into the blood circulation and any overdose is merely excreted via the gastrointestinal tract.
